

Brief Introduction of Economic Administrative School

The Economic Administrative School of Panzhihua University was founded in 1988. Along with the reforming and opening in China, it has developed promptly with the economy development. This school was famous for teaching base of finance, account, economy and administration in Panzhihua, Xichang and their circumjacent area.

Faculty

The faculties of this school, who are full of enthusiasm for the education and reformation, have profound knowledge. There are 60 full-time and part-time teachers, among which there are 14 professors and associate professors, 24 lecturers. There are 2 doctors, 10 masters among them, who are outstanding experts in Panzhihua, excellent young leading teachers in Sichuan province, leaders of science and research in Panzhihua. And these teachers have great capabilities in science research, and some science and research subjects have been awarded or financial aided by the government.

Major

The majors offered in this school are accounting (4 years), business administration (4 years), marketing (3 years), enterprise management (3 years), counting computer (3 years) and management information system (3 years). Some people who have taken part in the examinations of qualification of registration accountant, economizer have been trained and instructed in this school. During this decade, thousands of persons who have finished the study of ordinary higher education and adult professional education have served for Panzhihua, Xichang and other coastal area.

Laboratory

Two laboratories of management information system and accountant simulation have been built in this school. In the MIS lab, there are over 40 computers, multimedia projector, practicality projector and other teaching instruments. In the

construction plan of the university, the lab of electronic commerce and management simulation will be built and the MIS lab will be expanded before 2005. More than 20,000 books of economy and management and more than 100 kinds of periodicals are available in the library of the university.

Practice field

Teaching is integrated into the practice in this school. The trading bureau, business bureau, traffic bureau, audit bureau of Panzhihua and Panzhihua Iron and Steel Corporation have been supplied to students as the practice field. All these make teaching in the school keep up with the development of the economy.

Cooperation and intercommunication

Accommodated to the integration of economy of the world, it is inevitable to cooperate and intercommunicate with other universities, on which is emphasized by the cadres of the school. Sending teachers to be trained in other universities and cooperative teaching improve the teaching level of the school.

It is planed in this school to send visiting scholars and students abroad. The visiting scholars being sent are aimed to study the advanced science theories, teaching thought and teaching method and to intercommunicate with teachers of other universities. Meantime, some excellent students will be encouraged to study abroad.
