

Introduction of Civil Engineering School

The Civil Engineering School (CES) was founded in 1984. It is one of the initially established engineering schools in Panzhihua University. CES has cultivated more than 1500 qualified graduates and most of them have become technology backbones in the local architecture field as outstanding technology and management talents.

CES has a teaching group composed of 36 part-time and full-time teachers with profound knowledge, high practice ability, and plentiful training experience. Among them there are 4 professors, 9 associate professors, 21 lectures, and 24 postgraduates.

CES has its own training factories and workshops, the experiment and practice equipments of which are worth about RMB1.43 million Yuan. At present, it has established 4 labs of Engineering Measuring, Engineering Mechanics, Architecture Materials, Civil Engineering and 2 workshops for construction and installation technology; furthermore CES have several practice stations outside the school.
